End-point Assessment Powered by Pearl

Pearl epa

End-point Assessment system

Pearltech UK has produced a highly configurable End-point Assessment system to allow End-point Assessment Organisations (EPAOs) to manage their assessment caseloads efficiently, whilst providing their customers with a simple intuitive and engaging interface.

All you need...

Pearl epa tracks the entire End-point Assessment process from registration to ESFA notification and certification.

- Developed in collaboration with leading EPAOs, specialist and high volume providers to ensure that it meets real world requirements
- User specific dashboards highlight calls to action and provide business critical information
- 24/7 access from almost any device
- Intuitive interface requires almost no training
- Powerful configurable reporting tool
- Connect your existing systems to our RESTful API to maximise the power of your EPA journey
- GDPR compliant with tools to manage data requests
- Save time and travel costs using the power of Zoom video conferencing built right in
- Fully integrated online assessment using BTL Surpass
- Our document management system allows you to provide a wealth of support materials including, links, documents, SCORM training content and practice tests
- Fully configurable roles and permissions system gives granular control for any user

EPA Process

Registration

- Bulk import and update tools to quickly register and update learners
- Comprehensive support materials
- Contract management

Gateway

- Build customisable gateway specifications with tailored components
- Configurable gateway options capture detailed evidence or simple declarations
- Gateway submission by individual or cohort
- Practice tests and support materials to assist learners

Assessment Planning

- Plan meetings using video conferencing saving time and expense
- Efficient planning interface simplifies and speeds up the planning process
- Automatically updates everyone involved, on agreed dates and locations even when plans have to change

Assessment

- Automatic assessor allocation takes into account competencies, distance and conflict of interest
- Flexible Assessments schemas can be configured using generic or unique elements
- Assessments supported by integrated video conferencing and e-testing
- Learner progress tracking with issue notification

Certification

- Recognise success with custom achievement awards for each component
- Validated system generated content for submission to ESFA

Accountability

- IQA & EQA functionality to ensure compliance and high standards
- GDPR compliant
- Comprehensive change log tracks all changes in the system, keeping you in control
